

Best Practice: 01

01) Title of the Practice: Mask Making and Distribution

02) Objectives of the Practice:

- To control the spread of Covid-19 in the surrounding.
- To sensitize students towards the pandemic situation.
- To contribute to eradicate the pandemic situation.
- To increase labour dignity among students of the college.
- To help the people in the surrounding.
- To raise awareness among students and people regarding the threat of the pandemic.
- To inculcate the value of brotherhood among students.

03) The Context:

Perhaps one of the most striking lifestyle changes resulting from the COVID-19 pandemic is the mandatory use of face masks in grocery stores, restaurants and other public places. Wearing a mask, especially when in close proximity to others, is imperative to slowing the spread of COVID-19. Masks should be used as part of a comprehensive strategy of measures to suppress transmission and save lives; the use of a mask alone is not sufficient to provide an adequate level of protection against COVID-19. If COVID-19 is spreading in our community, stay safe by taking some simple precautions, such as physical distancing, wearing a mask, keeping rooms well ventilated, avoiding crowds, cleaning your hands, and coughing into a bent elbow or tissue.

4) The Practice:

The students who are N.S.S volunteers participated for this good cause. The students made 500 masks and distributed them among various villages in the area. Twenty college students have registered on the university portal to donate blood.

The Student Development Board of the college conducted Corona Outbreak Awareness Campaign. Under this initiative, the college has

undertaken the task of making 3000 masks and distributing them free of cost at various governments, semi-government offices in the area, banks, segregation centers, markets, etc. Awareness was created by distributing masks at the place. In this scheme prof. Bharat Chavan took special efforts. Prof. Suvruddesh Padole, prof. Sandeep Palve Mr. Imran Shaikh.

5) Evidence of Success:

Both students and people in the surrounding became aware of the threats raised by the spread of the Covid-19. The Principal, staff and students received oral responses in a positive manner for this activity. People in the surrounding started using masks on regular basis. It has been observed that the positivity rate of Covid-19 reduced gradually.

6) Problems Encountered and Resources Required:

There was an atmosphere of public fear even among the college students due to the spread of Covid-19 all over India. However, after the principal, professors and non-teaching staff of the college persuaded the students, their fears vanished. Moreover, the students started making masks and distributing them at various places in the area. For making masks, students used cloth, thread and sewing machines. The staff of the college used their own vehicles along with students for distributing masks at various places.
